

Ruthenium Red staining

2025-03-28 Woo-Taek Jeon

Purpose. Pectin staining for seed or root mucilages.

Reagent / condition	Preparation or use
0.05% solution	5 mg / 10 mL or 25 mg / 50 mL in water
Seed mucilage	0.01% aqueous Ruthenium Red; 5 min
Root mucilage	0.05% aqueous Ruthenium Red, pH 7.4; 30 min

1. Prepare the appropriate aqueous Ruthenium Red concentration.
2. Incubate samples using the condition appropriate for seed or root mucilages.
3. Observe with a stereomicroscope.
